PROFESSIONAL OBJECTIVES

My main skillset lies within research, planning, marketing and customer service. I thrive to improve on these with each new career choice.

My motto in life is that there is always a solution to any problem, "this can't be done" does not exist.

I am a fast problem solver and have an ability to learn new skills in a short period of time as proven by having successfully moved to multiple countries to live, work and study. I am relentlessly resourceful and I am currently learning how to code, as I see technology being at the centre of interesting new developments within my chosen areas of interest.

I am a very communicative person and like teamwork but also work well alone, as you can see in my experience below.
